

# District Growth Quarterly Report (Q4)

1 April to 30 June 2026

# 1 COMMENTARY - KŌRERO

---

## 1.1 NATIONAL & REGIONAL LEGISLATION AND POLICY

### 1.1.1 RESOURCE MANAGEMENT REFORMS:

#### National Direction

There were several significant changes to RMA national direction this quarter. The changes came in two main tranches following the broader national direction package that first came into force on 15 January 2026. The key changes were:

- National Environmental Standards for Electricity Transmission and Electric Vehicle Charging Infrastructure Activities (in force 07 May 2026)
- Changes to Stock exclusion regulations (in force 07 May 2026)
- Amendments to National Environmental Standards for Commercial Forestry (in force 04 June 2026)
- New National Environmental Standard for Papakāinga (in force 02 July 2026)

The National Environmental Standard for Papakāinga sets nationally consistent planning rules to make it easier for owners of Māori land to build homes and develop papakāinga on their land. The NES-P can be accessed via the link below.

[National Environmental Standards for Papakāinga 2026 | Ministry for the Environment](#)

The NES-P has been finalised and is now in force. The key provisions are:

- The NES only applies to development of Māori ancestral land or post-settlement governance entity land (refer definitions in the NES).
- Papakāinga involving up to 10 residential units are permitted where standards are met.
- Resource consent (with restricted ability to impose conditions or decline consent) is required where:
  - Standards set by the NES are not complied with;
  - the papakāinga involves up to 30 residential units;
  - where adjoining sites are used for intensive indoor farming, mining, quarrying or rural industry.
- Resource consent (unrestricted discretion) is required where more than 30 residential units are proposed.

No changes to the Waipā District Plan are needed. The existing provisions will continue to apply to any papakāinga development that is on general land. The NES-P closely aligns with Proposed Plan Change 23 – Papakāinga which has been paused pending the release of the new national standard.

#### Planning Bill & Natural Environment Bill

The Environment Committee reported the Planning Bill and Natural Environment Bill back to the House on 20 July 2026. The Committee recommended, by majority, that both bills be passed, subject to a large number of amendments. The report formally concluded the select committee stage and cleared the bills for their Second Reading in Parliament.

The bills proceeded to their Second Reading on 4 August 2026. The Government's implementation documents signal that transitional provisions would begin shortly after Royal Assent, with a multi-year process to prepare new national instruments, regional spatial plans, land use plans and natural environment plans.

The transitional provisions will include some changes to how resource consents are currently processed and decided on. In particular Council will no longer be able to have regard to any of the following matters:

- Internal building layout
- Any effects of eternal building layouts that remain within the boundaries of a site
- Negative effects on trade competition
- Effects on retail distribution
- Any lack of demand or the financial viability of a project
- The type of residents housed in a new development
- Views from private property.

### 1.1.2 BUILDING REFORM UPDATE

| Proposed Reforms                                                                                   | Status                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Building and Construction Sector (Self-certification by Plumbers and Drainlayers) Amendment Bill   | As at 21 August 2026, the Building and Construction Sector (Self-certification by Plumbers and Drainlayers) Amendment Bill has passed and is now law.<br><br>Implementation of the changes is expected around September 2026, once the Board has completed the necessary notices and issued certifications to those who have opted into the scheme.                                                                                                                                                                                                 |
| The Building and Construction Sector (Strengthening Occupational Licensing Regimes) Amendment Bill | As at 21 August 2026, the Building and Construction Sector (Strengthening Occupational Licensing Regimes) Amendment Bill is not yet law.<br><br>It passed its second reading on 30 July 2026 and is now awaiting the Committee of the whole House, third reading and Royal Assent.<br><br>For BCAs, one of the more relevant aspects is the proposed changes to the Licensed Building Practitioner (LBP) regime, including strengthening the regulatory and disciplinary framework and improving the ability of regulators to deal with complaints. |
| The Building (Earthquake-prone Buildings) Amendment Bill                                           | As at 21 August 2026, the Building (Earthquake-prone Buildings) Amendment Bill has passed its second reading and is currently at the Committee of the whole House stage. It has not yet become law.<br><br>The key proposed change is to replace the current earthquake-prone building framework with a more proportionate, risk-based system, focusing regulation on high-risk building types in medium- and high-seismic areas. Earthquake ratings would no longer be used in the same way, with tiered mitigation requirements based on risk.    |
| Building Amendment Bill                                                                            | As at 21 August 2026, the Building Amendment Bill 2026 is currently before the Transport and Infrastructure Select Committee and has not yet become law. It was introduced on 28 June 2026 and passed its first reading on 30 June 2026.<br><br>Submissions are currently open, with the Select Committee report due 29 December 2026.<br><br>The Bill proposes a broad range of changes to the Building Act 2004, aimed at reducing costs and delays, clarifying roles and                                                                         |

| Proposed Reforms | Status                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                  | <p>responsibilities, and improving the efficiency of the building consent system. Key proposals include a 10-working-day fast-track consenting pathway for eligible sustainable/solar-equipped homes, changes to PIMs, and amendments to liability and BCA arrangements.</p> <p>In short: the Bill is at an early stage of the legislative process and is currently with Select Committee. Any changes are proposed only at this stage and are subject to the Select Committee process and further readings.</p> |

## 1.2 DISTRICT PLAN PROGRAMME

### 1.2.1 COUNCIL-LED PLAN CHANGES

| PLAN CHANGES                                                                                         | STATUS                              | TIMEFRAMES<br>(INDICATIVE)             | COMMENTS                                                                                                                               |

The summary of submissions was publicly notified on 30 July 2026 with closing date for receipt of further submissions being 13 August 2026. | 26 March 2026                | To be determined                                           |

### 1.3 RESOURCE CONSENTS

#### 1.3.1 CONSENTS SUMMARY

This reporting period showed a small decrease in resource consent numbers with 101 consents processed this period (60 Land Use and 41 Subdivision) and 106 consents processed (60 Land Use and 46 Subdivision) the same period last year. All consents this period were processed within the allowable statutory timeframe (*refer to figure 1*).

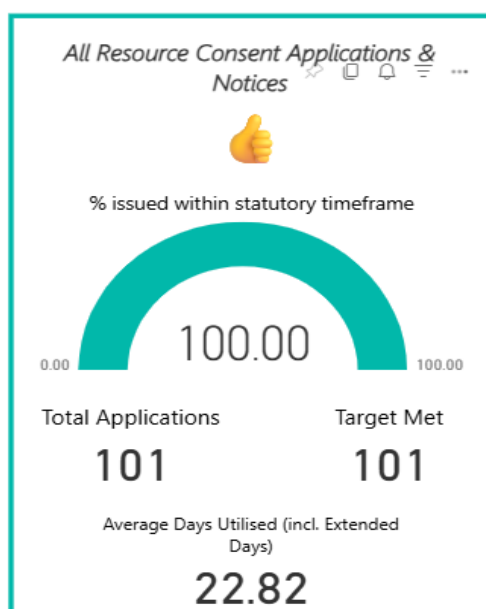

**Figure 1: All Resource Consent Applications**

### 1.3.2 NOTIFIED CONSENTS

There has been one notified consent during this period. An application to establish and operate a managed fill activity at 3831 Cambridge Road, Cambridge was limited notified and submissions closed on 29 June 2026. Eighteen submissions in opposition were received. A second round of limited notification occurred to 12 additional properties. The submission period closed on 31 August 2026 with three submissions in opposition being received. The hearing date has not been set but it will be a joint hearing with Waikato Regional Council.

### 1.3.3 ENVIRONMENT COURT APPEALS

There have been no appeals during this period.

### 1.3.4 OBJECTIONS RECEIVED

There have been no new objections received during this period. The existing objection to application processing costs made by Global Contracting Solutions Limited is yet to be resolved. As an objection to costs was also made to Waikato Regional Council, a joint hearing will be held on 7 September 2026.

### 1.3.5 LAND INFORMATION MEMORANDUMS (LIMS)

LIM volumes increased significantly with 309 processed this period and 261 processed the same period last year. All LIMS were processed within the required statutory timeframes, including all urgent LIMs.

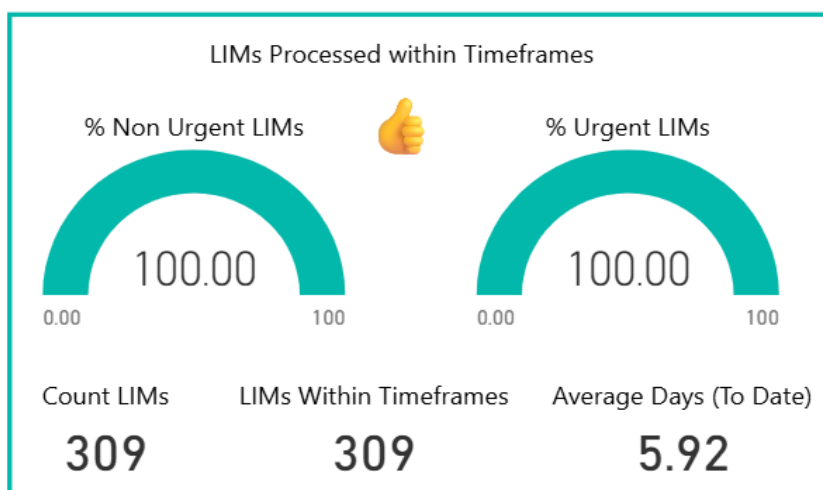

**Figure 2: All Land Information Memorandums**

## 1.4 GROWTH AND REGULATORY DEVELOPMENT

There continues to be steady progress in land development projects across the growth cells and interest by way of pre-application meetings also continues. The following tables combine engineering updates from the growth and regulatory areas for each active growth cell (*refer to Appendix 1 for the Growth Cell Maps*). Updated text shown in **RED**.

| CAMBRIDGE STATUS UPDATE                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |

| An industrial subdivision has been lodged by the Bond Road developer and is being assessed by Council staff with the developer primarily engaging with Waikato Regional Council staff. Currently on hold and no further updates. |  |

#### 1.4.1 DEVELOPMENT CONTRIBUTIONS

72 Development Contribution Notices equating to \$1,775,469 (incl. GST) have been issued. Of those notices generated, there were twenty-five (25) from Building Consents, eight (8) from Project Information Memorandums (Granny Flats exempt from building consents with area less than 70sqm), four (4) from Land Use Consents and thirty-five (35) from Subdivisions. Main contributors to the notices issued are Summerset retirement village development agreement charges located in Cambridge North, C2 growth cell Development Agreement Charges and medium scale residential developments across the district.

Recovery for this quarter equates to \$1,079,869 (incl. GST), which is a decrease from the same period in 24/25 financial year (\$3,816,251 incl. GST). Decrease can be attributed to development agreement that reached deadline in Q4 of 24/25 financial year. In Q4 of 25/26, no development agreement reached deadline. Largest revenue is derived from residential development within C3 growth cell and other medium scale developments across the district.

Recovery is generally in alignment with forecast for the year, given the forecast is linking to mostly development agreements and consents that are of age when completion is expected. For more information on where Development Contributions (DC) have been issued and received relative to our identified funding areas, please refer to “Appendix 3 – Development Contributions by Funding Area”.

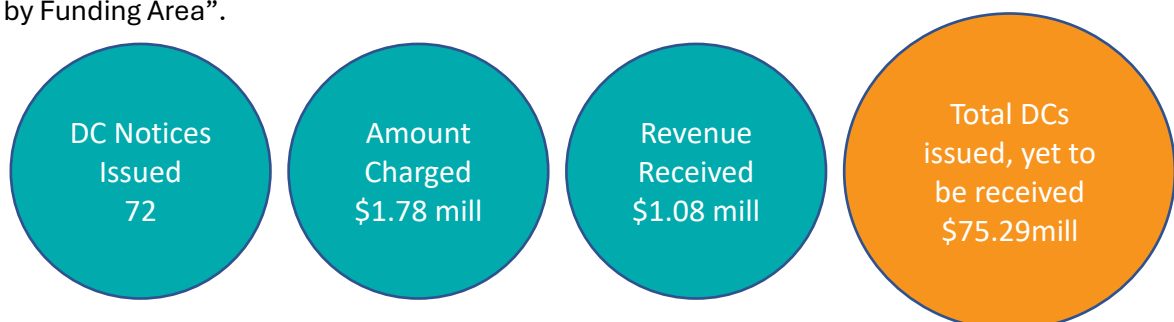

**Figure 3: Teal shows this quarter specific, orange is overall**

Below shows the relationship between total issued DCs and recovered/remaining DC charges over the whole history of Development Contribution Policy (refer to figure 3). We are currently tracking 52% of total issued DCs as recovered and 48% of DCs remaining active charges. For further information about catchment specific DC revenue and outstanding DC charges please refer to “Appendix 3 – Development Contributions by Funding Area”.

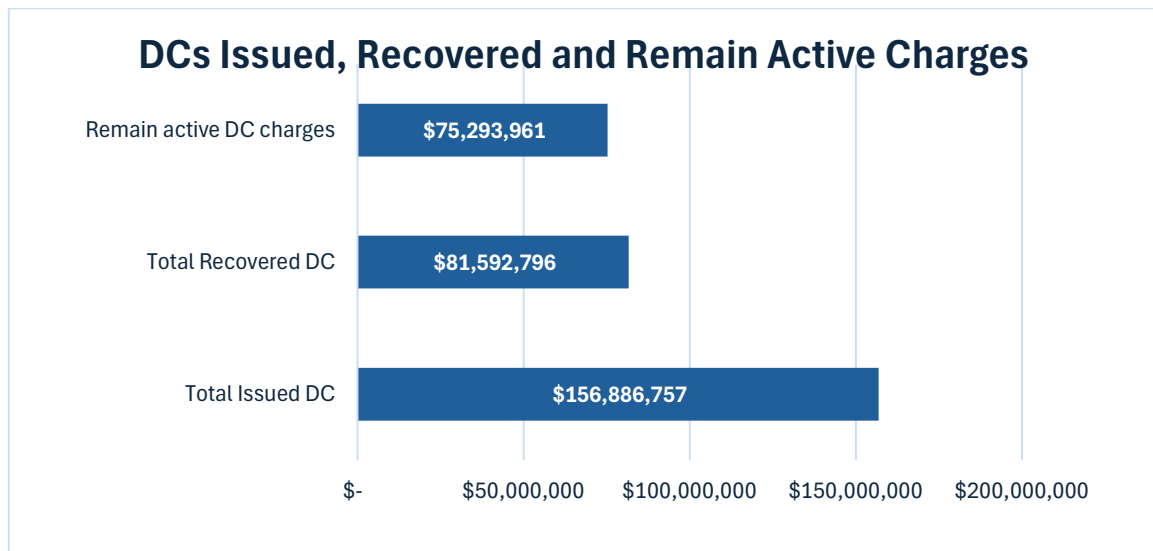

**Figure 4: DCs Issued vs. Remaining Active DC charges and Recovered DC over the history of Development Contribution Policy**

## 1.5 BUILDING COMPLIANCE

### 1.5.1 NEW BUILDING CONSENTS ISSUED

A total of 282 building consents were issued between the 1st of April 2026 and the 30th of June 2026. This is a 5.6% increase from the 267 issued during the same period in 2025.

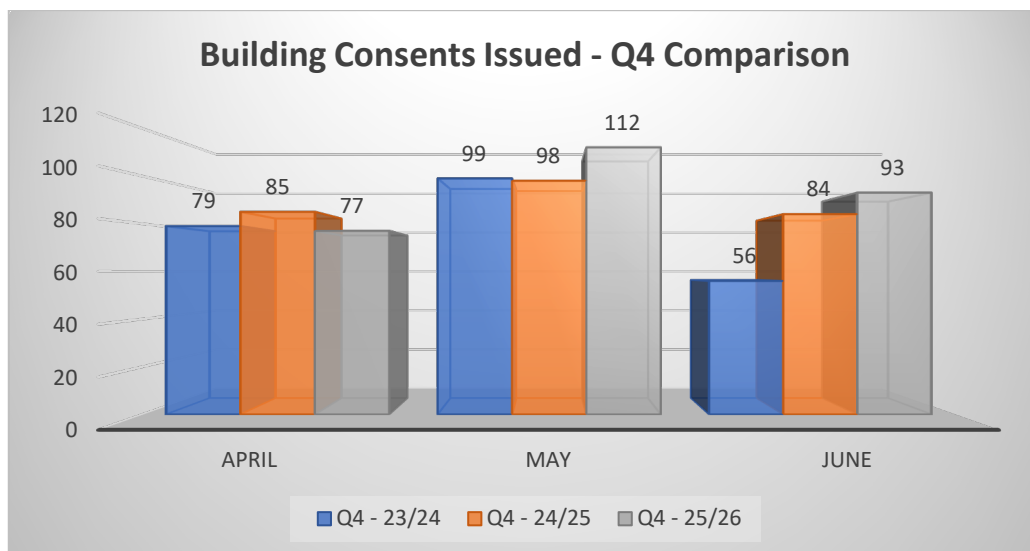

**Figure 5: Building Consents Issued**

### 1.5.2 CODE COMPLIANCE CERTIFICATES ISSUED

A total of 253 code compliance certificates were issued between the 1st of April 2026 and the 30th of June 2026. This is a 19.4% decrease from the 314 issued during the same period in 2025.

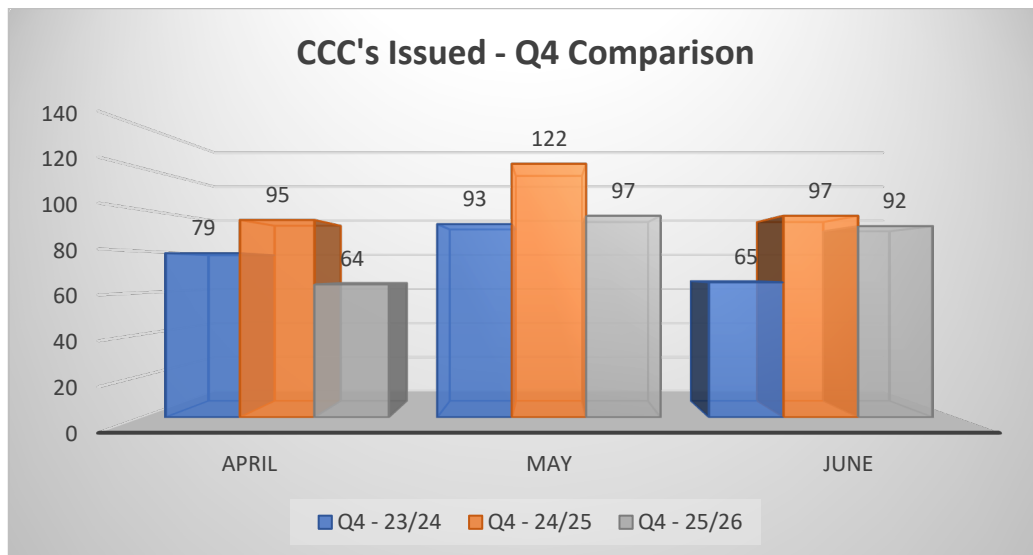

**Figure 6: Code Compliance Certificates Issued**

### 1.5.3 NEW DWELLINGS

A total of 72 building consents were issued for New Dwellings between the 1st of April 2026 and the 30th of June 2026. This is a 33% increase from the 48 issued during the same period in 2025. Figure 6 below shows the dwellings by location Cambridge and Leamington, Te Awamutu & Kihikihi, and the rest of Waipā.

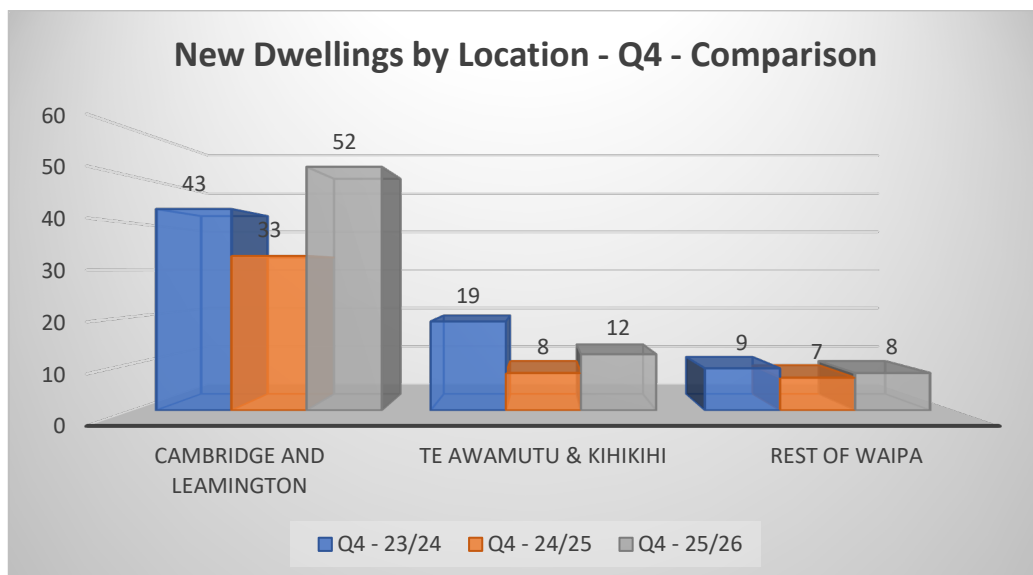

**Figure 7: Building Consents Issued**

### 1.5.4 TOTAL VALUE OF BUILDING WORK

An estimated total of \$106,110,000.00 worth of building work was consented between the 1st of April 2026 and the 30th of June 2026. This is a 13% increase from the \$92,058,000.00 consented during the same period in 2025.

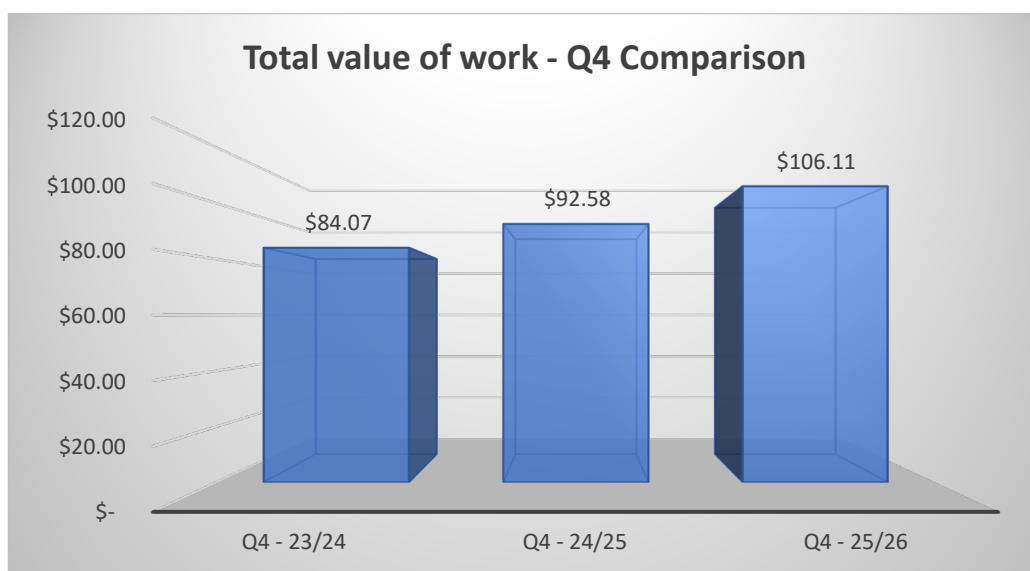

**Figure 8: Total dollar value of building work**

### 1.5.5 BUILDING CONSENTS OF INTEREST

There were three building consents of significant interest issued between the 1st of April 2026 and the 30<sup>th</sup> of June 2026. Significant building consents include projects where the estimated project value exceeds five million dollars, or the building may be considered a particular significance to the community.

- 222 Peake Road, Cambridge, New Warehouse with Associated Office Facilities, \$5,848,000.00
- 31 Meridian Drive, Hamilton, Tekplas Warehouse Extension, \$5,000,000.00
- 179 Ossie James Drive, Hamilton, Construction of a new Jet Hangar and Associated Works, \$7,600,000.00

## 1.6 MONITORING AND ENFORCEMENT

In total Council's Enforcement team responded to 92 complaints and queries regarding Planning issues. This comprised of 66 complaints regarding breaches of the District Plan and 26 complaints about the potential breach of Resource Consents conditions.

District Plan complaints received concerned amenity values, earthworks, home occupations.

All District Plan / Resource Consent queries were responded to within four days as required by one of the Team's KPIs.

A further 16 queries regarding swimming pool barriers were also received and responded to. During the quarter a total of 150 swimming pool barrier inspections were conducted.

157 customer queries were received regarding Council's Bylaws and potential breaches. This included 128 complaints / queries specifically regarding parking offences.

A total of 12 complaints about littering / rubbish dumping were received. In seven (7) instances an infringement was issued where an offender could be identified from the team's investigations.

One hundred and twenty-nine (129) parking infringement notices were issued in the quarter. The majority were for ‘overstaying’ in time limited parking in both the district’s CBDs.

This figure is lower than previous quarters owing to the Enforcement Team losing a staff member to resignation, recruitment is currently underway to replace the member.

Ten (10) further complaints were received regarding the use of Council’s car parking areas and Reserves and Parks; these were mainly around freedom campers and / or homeless people living in their cars.

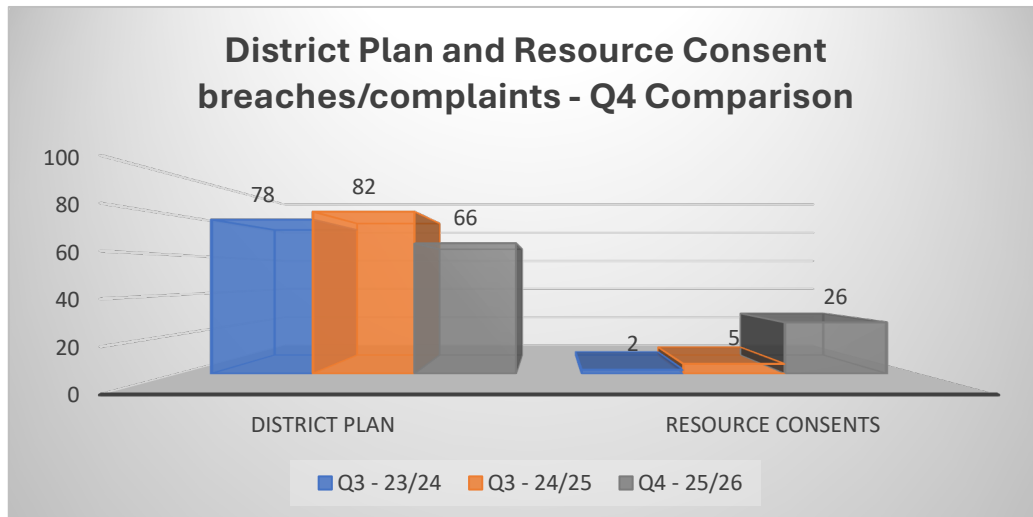

**Figure 9: District Plan and Resource Consent breaches reported to Enforcement**

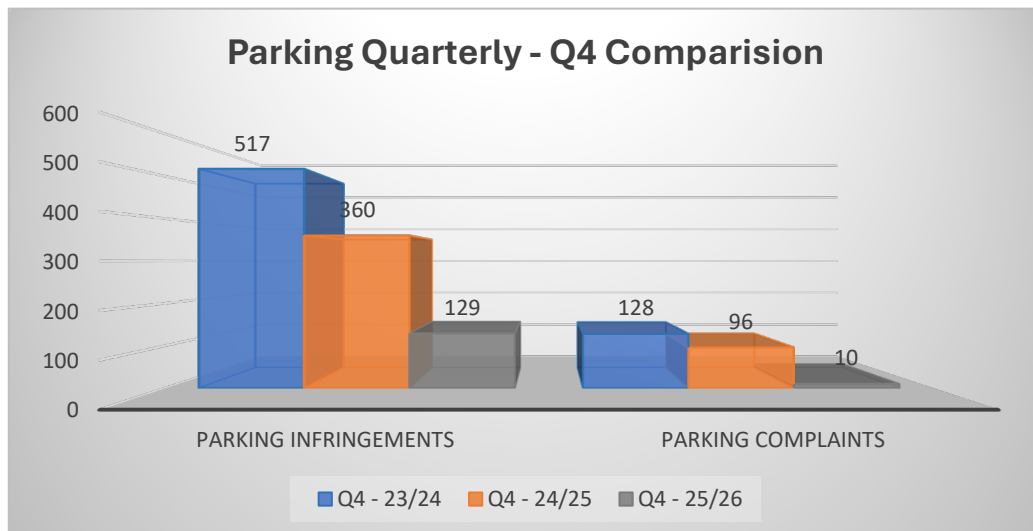

**Figure 10: Parking Infringements issued, and Parking complaints received**

## 1.7 ANIMAL CONTROL

This quarter there were a total of 1,223 requests, with 809 being administration calls or requests for information, and 414 relating to animal control issues (including reports of lost dogs/stock).

Of these 95 were about barking dogs, which is less than last month but probably an expected trend in winter when dogs tend to curl up and not show so much interest towards neighbourhood happenings. Barking issues still do account for a substantial amount of an animal control officer’s time.

Attack numbers were also down a little, with 14 of the 24 reported being attacks on other animals, six on adult persons and four on a child. Most of the reported attacks were relatively minor in terms of injuries. We had a successful prosecution this quarter for a serious attack on a child that occurred in January 2026. Sentencing is still to take place. The offending dog had already been euthanased prior to the Court hearing, with the owner’s permission.

In addition to complaints investigation, staff conducted 337 fence inspections (for the purpose of providing rebates off dog registration fees) and followed up 106 unregistered dogs.

60 dogs/pups were impounded over this time frame. Of these 36 were claimed by their owner, 12 rehomed and four euthanased, with eight remaining in Council or foster care at the end of the quarter.

1.7.1 DOG REGISTRATIONS

At the end of the 2025-26 year just over 95% of active dogs were registered which was slightly less than previous years, and 448 dogs (4.7%) were known to be unregistered as at 30 June.

Dog re-registrations for the 2026-27 year have been tracking along nicely with 68.2% of known dogs re-registered by the end of the quarter. Still one month of the official dog registration period to go, with additional penalty fees applied from around 1st August each year.

The increase in fees has been difficult for some of our dog owners, particularly those who pay after the due date and subsequently have additional penalty fees to pay. The registration fee increases over the last 2-3 years have likely contributed to the lower re-registration numbers and the lower number of dogs over-all on our register.

In May/June/July this year we targeted dog owners who are repeat offenders in terms of not registering their dogs, mostly via property visit. We worked with these owners early to get their dogs registered before late penalties are applied for the current registration year. This was very successful with a number paying immediately, and some others beginning payment plans. Ultimately some will still require enforcement, but we recognise that times are tough and we are glad to have been able to help many owners avoid extra fees and fines.

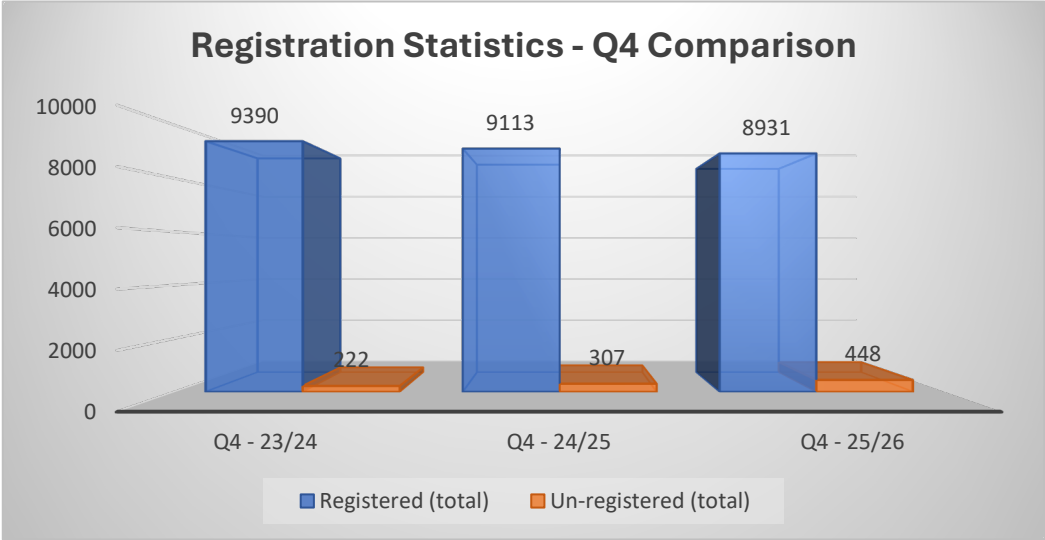

Figure 11: Registration Statistics

## 1.8 ENVIRONMENTAL HEALTH

There were a total of 474 enquiries relating to food, noise, contaminated land, licensing and public health for this quarter.

The team inspected 62 food premises, 1 health licence premises, 61 alcohol licensed premises and received a total of 204 noise complaints.

No equipment was seized during this period.

Registered Food premise numbers increased by 5, one new On Licence was issued, to Babas Kebab & Curry. Noise complaints decreased by 26, from the previous quarter.

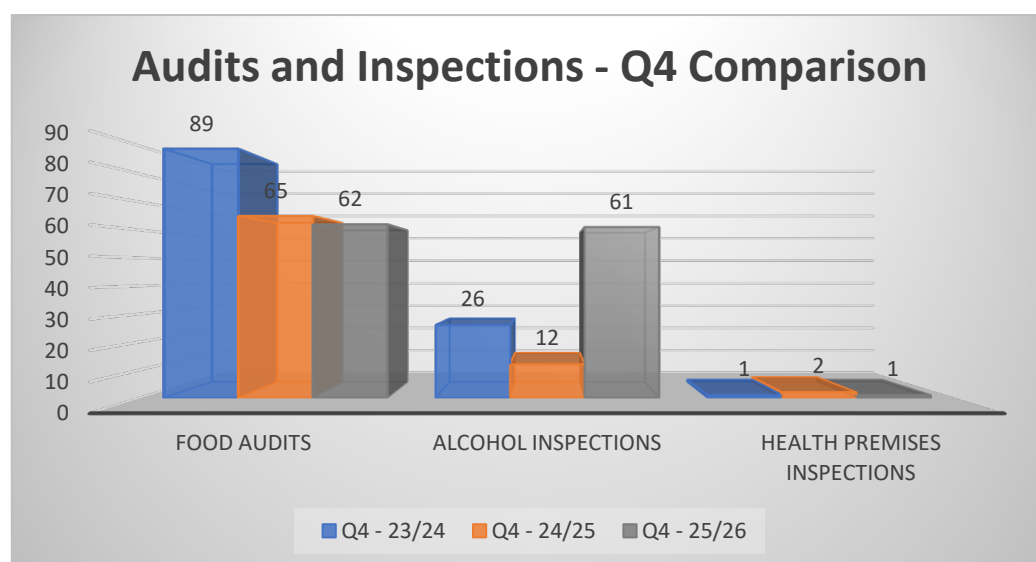

Figure 12: Audits and Inspections

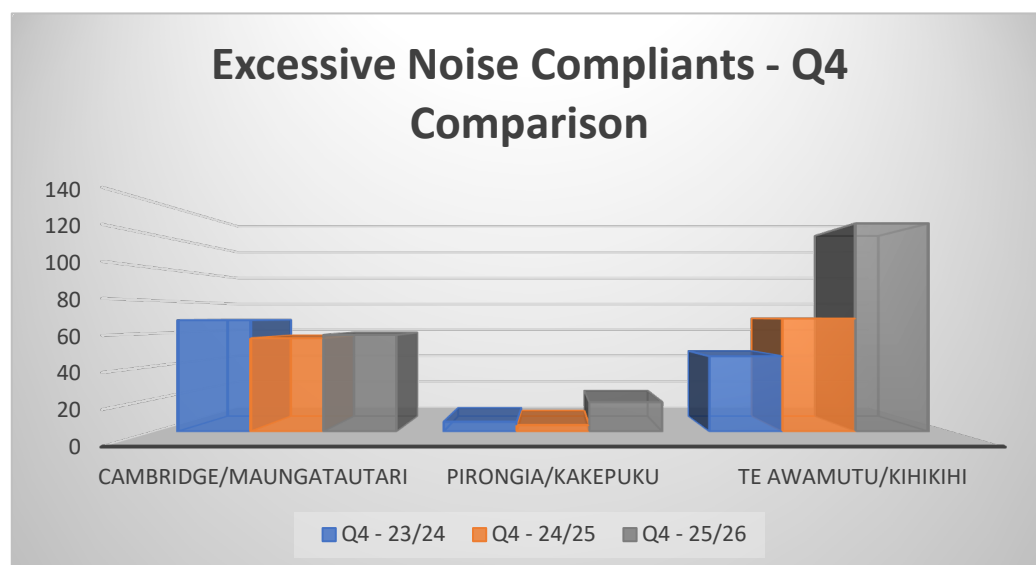

Figure 13: Noise Complaints

### 1.8.1 DISTRICT LICENSING COMMITTEE

The District Licensing Committee had no hearing days during this quarter.

Progress has been made in reducing the processing time for alcohol licence applications. As at the end of the quarter, three (3) licence files awaiting processing are 12 months or older. The aim is to have all applications processed within 9 months by end of the calendar year.
